at your client's request especially in cases where your client is not satisfied with the responses provided by the chatbot.

Chatbot + Human Support

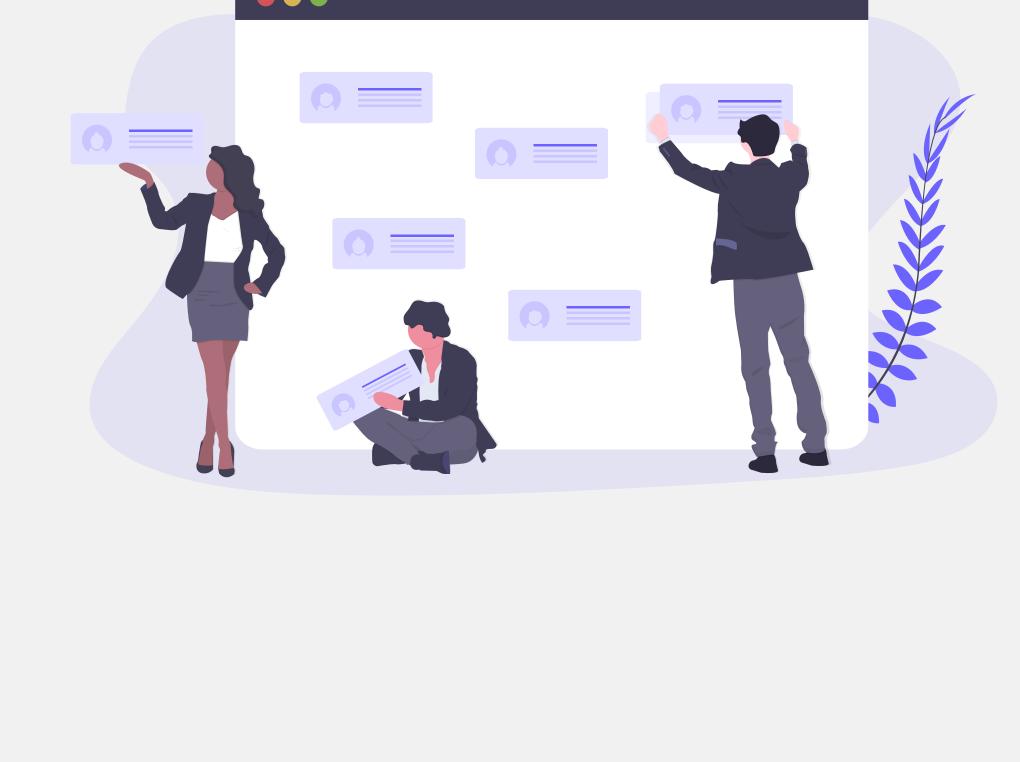

Optimize your customer service for a delightful experience. No more worrying about losing your customers again.

Enjoy an automated system that only shifts to human interactive mode

Bill & Collect Payment through SMS

Send out transactional messages and help improve your revenue collection.

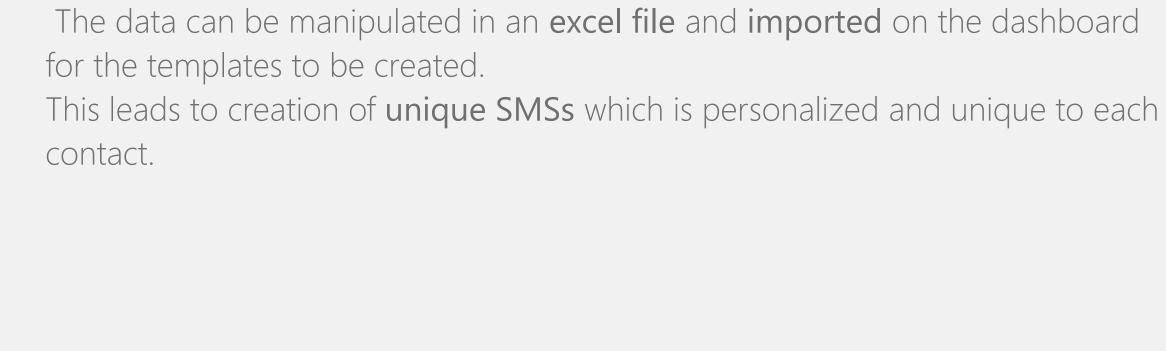

TalkLift SMS chatbot helps you to automatically segment potential leads into different sales pipelines.

Leads Nurturing

converting them.

Leads segmentation is important to keep your data organized and ready for use in sending personalized message.

Use interactive automated SMS to engage potential leads with an aim of

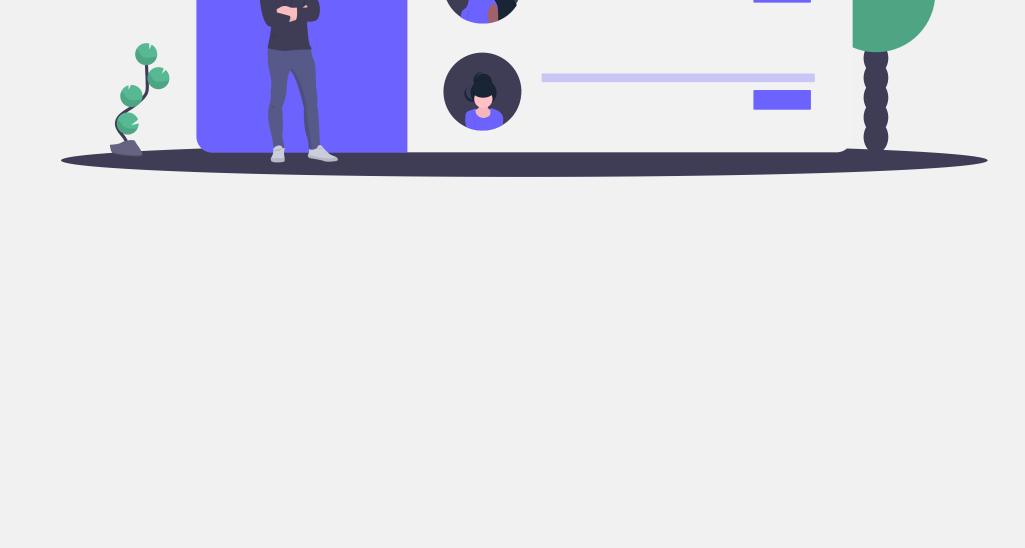

Personalized Bulk SMS Data Importation

the campaign.

Multiple SMSs can be generated from a single SMS template with variable data

like name, account number, amount etc changing depending on the objective of

Reminders, important dates and occasions can be marked out and reminders sent ahead of time e.g. reminders on policy renewal, meetings, payment of goods and client's birthdays.

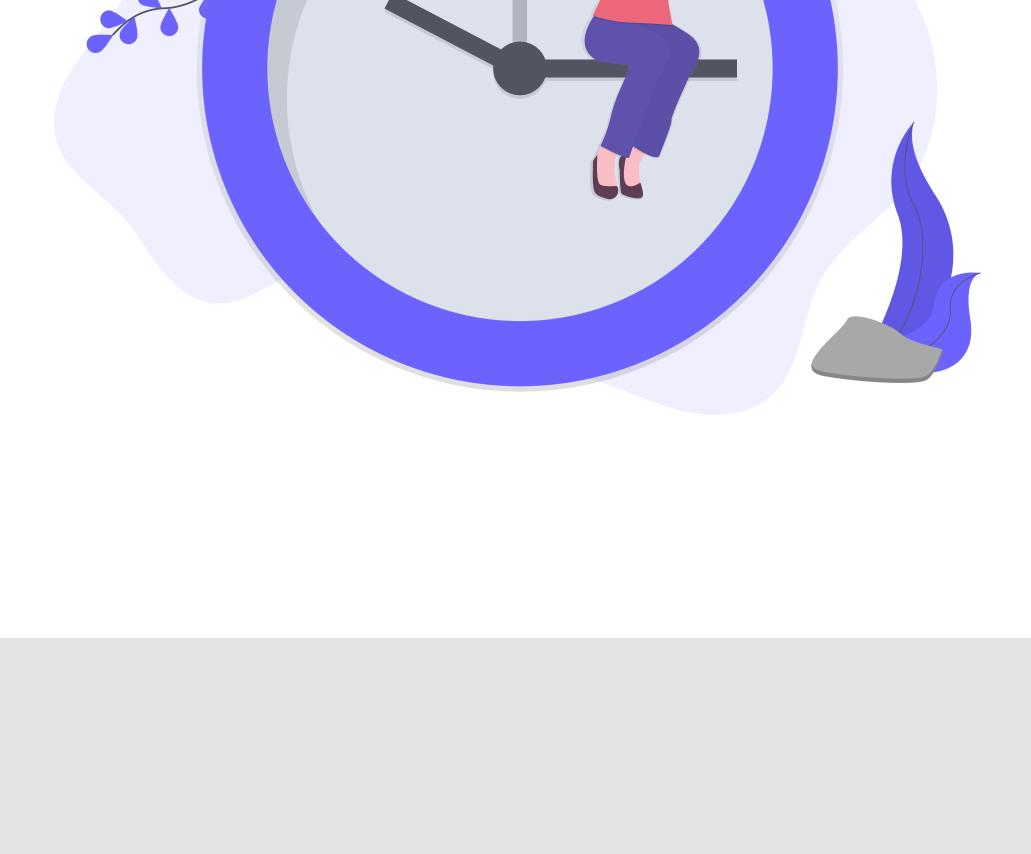

Reduced workload, after creating a messaging plan,

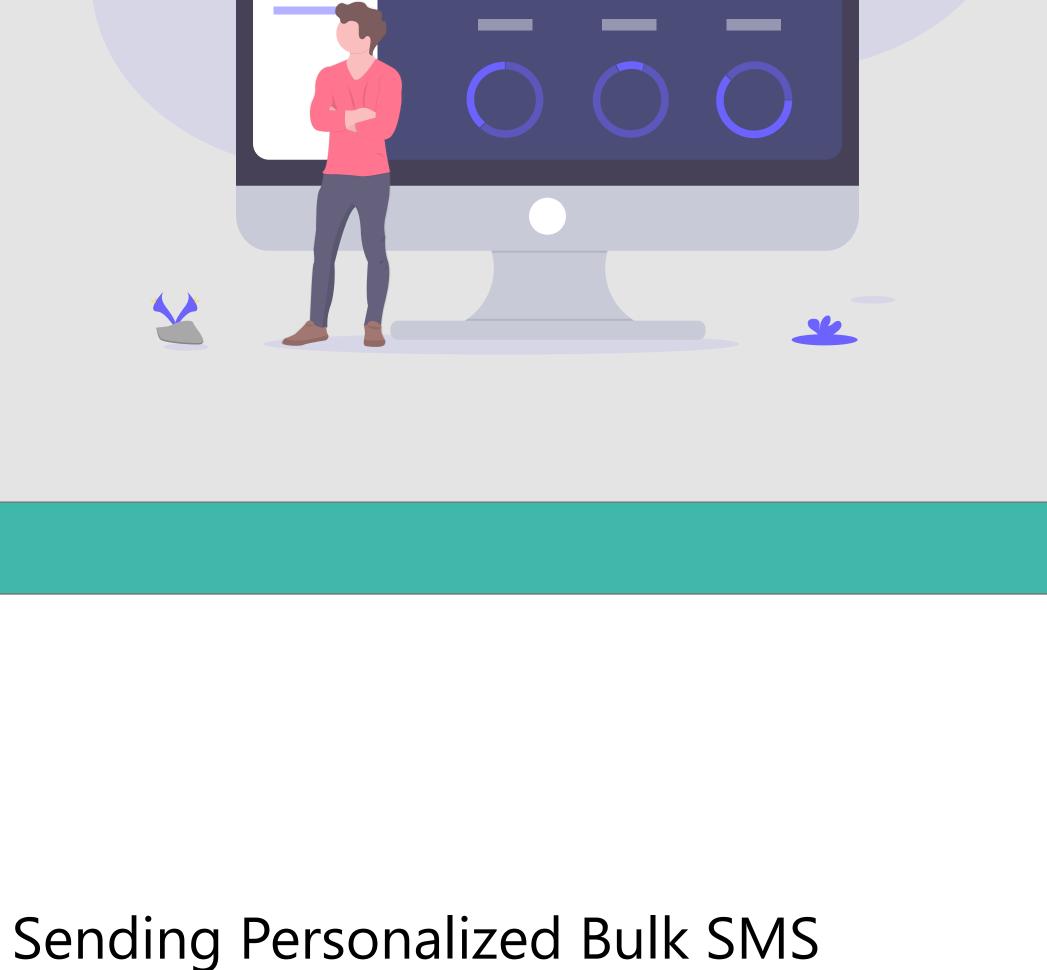

the messages are sent out at the specified time.

SMS Scheduling and Reminders

Scheduled messages, the process of sending messages is automated

hence you don't have to be at your computer to send messages to your clients.

by doing simple things like addressing your **users** by their names.

A proper lead segmentation will enable you to send a targeted message

Consider making the message relevant and timely.

You can personalize your message

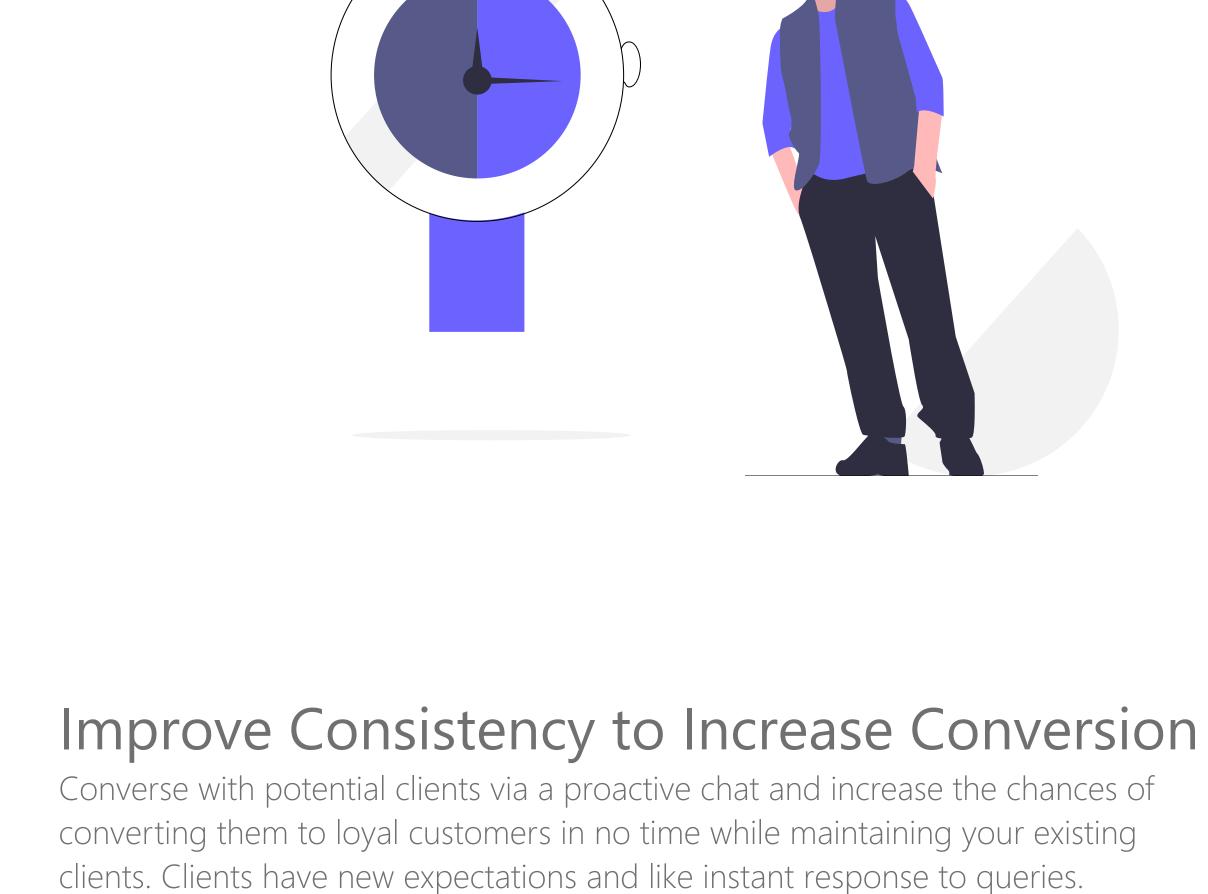

based on users' behavior and interest.

Single Manageable Dashboard

and retain them.

Visualize the conversation between your clients and the chat bot

hence enabling you to understand your customers' needs better

Round the Clock Customer Service

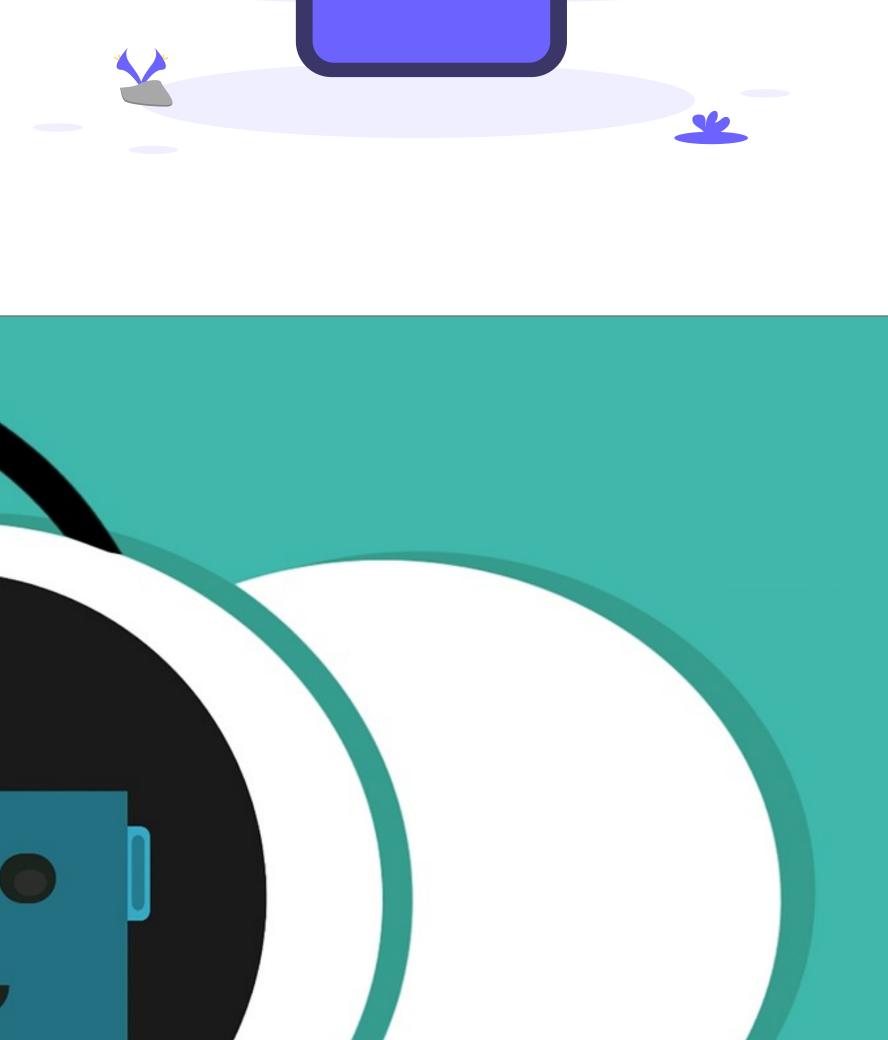

holiday. Chatbots provide a scale-able way to offer your service.

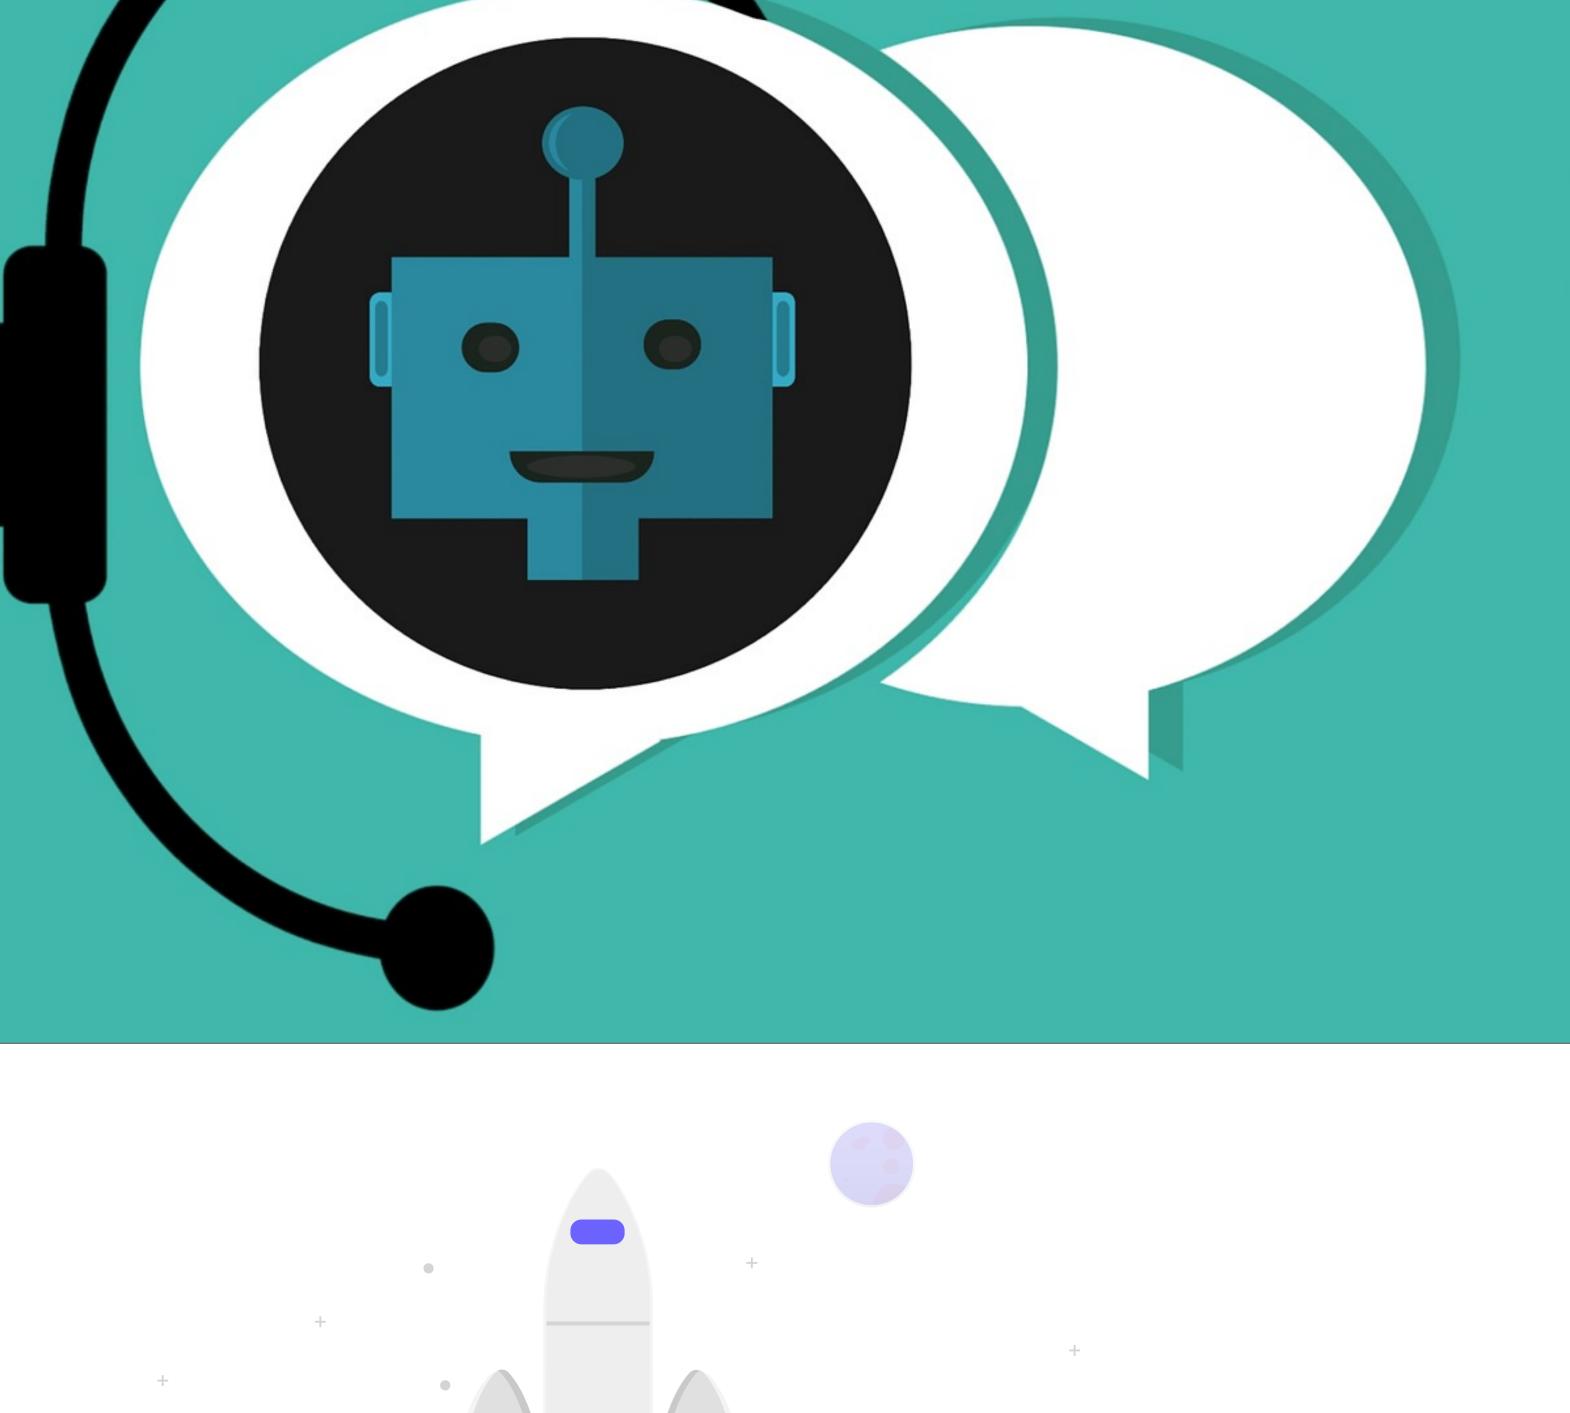

Chatbots provide customer engagement round the clock

whether your business is open or closed for the weekend or

A single chatbot can serve thousands of users concurrently,

better than human support agents.
